DETAILED ACTION

Election/Restrictions

- I. Claims 1-4, 5-10 and 29-34, drawn to a method for implanting a heart valve, classified in class 128, subclass 898.
- II. Claims 11-15 and 18-28, drawn to means for implanting a heart valve, classified in class 623, subclass 2.11.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus of invention II could be implanted by a materially different process such as by measuring the anterior and posterior leaflet base prior to the implantation and implanting the valve during open heart surgery.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Robert Patch on 3 February 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
